

Manual Blasting & Spray Painting Chamber Systems

SPEEDO Manual Blasting and Spray Painting Chamber Systems are specially engineered to meet demands for a more economical and environmentally friendly solution for surface preparation, blast cleaning and finishing applications.

Our various range of high quality and carefully designed equipment satisfies this requirement of providing full system solution design for blast & paint chamber to perform abrasive blasting and spray painting for surface preparation and finishing operations in various industries.

Our equipment for surface preparation facility provides:

- ✓ Environmentally friendly and non polluting systems.
- ✓ Operator friendly and safe working environment.
- ✓ High quality surface preparation and finishing.

Speedo Marine provides Design, Manufacturing and Installation for Blasting and Painting Chambers in the following range of products which are highly used in Marine, Oil and Gas, and Other General Industries.

Various Type of Systems Available for Manual Blasting & Painting Chamber:-

- | | |
|--|---|
| 1) Industrial Dehumidifier System | 9) Full Floor Sweeper Recovery System |
| 2) Heavy Duty Vacuum Abrasives Recovery System | 10) Bucket Elevator System |
| 3) Air-Cooling and Air- Cooler System | 11) Screw Conveyor System |
| 4) Blast and Vacuum System | 12) Belt Conveyor System |
| 5) Dust Collector System | 13) Abrasives Air Wash Separator System |
| 6) Portable Blasting Machine (PBM) System | 14) Abrasives Storage Hopper System |
| 7) Mega Lift-Up Door System | 15) Air Compressor System |
| 8) Pneumatic Abrasives Recovery System | 16) Others, etc. |
