

T100™ SERIES

SUPERIOR LIGHTWEIGHT
PROTECTION

T100™ SERIES

LIGHTWEIGHT PROTECTION

The RPB® T100™ Series is a cost-effective disposable respirator. The economical option that provides lightweight protection and premium quality.

Used throughout a variety of industries from industrial spray painting to chemical handling, the T100™ has been designed to be robust enough to reuse but cost effective enough to discard after use.

It is manufactured from DuPont™ Tychem® and offers superior comfort compared to conventional, tight, full-face respirators. The hood protects your entire head, eliminating the need for a head sock. A large variety of hood options with different features are available.

Users with facial hair commonly convert to loose-fitting respirators so they don't jeopardize their protection. There is no fit-testing required, saving you time and money, while maintaining OSHA compliance.

ANSI Z89.1*
EN397:2003 +A1:2009
AS/NZS 1801:1997

HARD HAT
PROTECTION

* Not all configurations conform to this standard. Please visit rpbsafety.com for more details.

Large lens providing excellent peripheral and downward vision.

Impact protection lens.

Tuck-in collar directs air over the upper body to provide additional cooling.

Air duct directs the airflow to the operator's breathing zone.

Optional barrier seal for more demanding environments.

Peel-off lenses protect the main lens from chemical splash, spray drift and dust.

* From local and globally sourced components.
